

C1 21 28. (AMENDED) ²⁶The illumination assembly of claim 21 or 22 in combination
with an implement mountable on a user's head, wherein the attaching means is
removably attachable to the implement.

C2 30 31. (AMENDED) ²⁶The illumination assembly of claim 21 or 22 wherein the
attachment means comprises a clip for removably attaching the housing to the
headgear substantially coaxial with the user's line of sight.

C3 32 33. (AMENDED) ²⁶The illumination assembly of claim 21 or 22 wherein the
aspheric lens has a diameter of less than 2 centimeters.

C4 33 34. (AMENDED) ²⁶The illumination assembly of claim 21 or 22 wherein said
illumination assembly without the light guide and mounting means has a weight of less
than about 10 grams.

C5 34 35. (AMENDED) ²⁶The illumination assembly of claim 21 or 22 wherein said lens
include an aspheric face and an opposing planar face, the lens being mounted such
that said aspheric face faces inwardly.

C6 ~~55. (AMENDED) An illumination assembly for dental and medical applications~~
comprising:
